AYCH QUEST

Genesis of the project: diversity of approaches and partners: engaging young people & education

[French version here](#)

The diversity of partners and approaches has led us to refine our first very classic approach to the AYCH process. With our exchanges with the partners of the youth services, the classical linear and processual journey from the idea to the incubation has gradually been enriched around an educational experience and a path, more adapted to the needs expressed by the participants in the AYCH project.
